

MPLS Services

Private IP Networking Solutions

Overview

Our MPLS services are designed to provide fully managed connectivity solutions for businesses requiring to connect two or more sites. MPLS overlays your private network over ours to give you global reach at a fraction of the price. Build your network and get your traffic flowing the way you want. No complex know how needed. We'll do all the hard work for you.

Choose MPLS if You:

- » Need to connect multiple offices using your own IP addressing.
- » Want secure, off Internet, private connections between offices.
- » Want the flexibility to deploy traffic shaping for converged Voice and Data networking.
- » Don't want the hassle of managing a multipoint wide area network.

Flexibility

MPLS installations are truly flexible. For example, you can connect offices together as shown and only need an Internet connection at one or two of your sites. Network layer routing ensures all your sites are able to get to the Internet. Also, put your IP telephony switch at one location and share it across all your sites. Open the door to endless possibilities.

Full technical specifications

- » Speeds from 2Mbps to 100 Mbps.
- » ADSL2+ (speeds upto 20Mb).
- » Strict SLA, managed bandwidth dedicated and monitored between your sites.
- » Fully managed Layer 3 routing flexibility between your sites. Choose Hub and Spoke or Full Mesh routing topology between nodes.
- » Preconfigured Cisco Routers.
- » Engineers available at our Customer Service Centre.
- » Engineers available at our Customer Service Centre.

Comprehensive SLAs

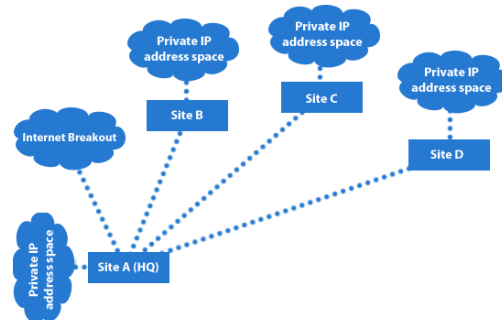

- » 99.9% Network availability as standard.
- » Guaranteed Time to Restore (GTTR).

Business Insight Tool

- » Monitor bandwidth usage.
- » Monitor Latency, Jitter, Loss.
- » Monitor Application Traffic.
- » Monitor SLA.

Options

- » Quality of Service
- » Mediated Public Internet Access
- » Secure Remote Workers
- » Managed Firewall.
- » Data Storage.
- » Same Day/Next Day hardware replacement.
- » Onsite engineer install.
